ABOUT COMPANY

Olimp Laboratories was created more than 30 years ago with one aim "to ensure better comfort of life, strength, health and vitality for our customers". Since then, Olimp has become the European leader in providing state-of-the-art nutrition formulas with advanced ingredients and unique compositions. An outstanding atmosphere of cooperation, friendship and mutual support results in a modern and complex approach to our customer's needs and market trends. Thanks to our determination and intensive research work, we are able to contribute to your healthy lifestyle, complimenting both sports activity levels and a healthy & balanced diet.

In-depth knowledge, experience and cooperation with professionals from the field of nutrition and supplementation make our products unique and extremely effective, while maintaining their high quality and reliability.

Olimp Labs has a well-organized unit responsible for product development and research into new ingredients and formulas, provided with state-of-the-art R&D laboratories. We are also known for being one of the few supplements manufacturers, who obtained full GMP certificate, covering manufacturing operations and batch certification.

SHIME®

Simulator of the Human Intestinal Microbial Ecosystem

One of the 9 Artificial Digestive Systems in the world, and the only one in Poland, at such an advanced level, is located at the Olimp Laboratories Research and Development Centre. It enables the performance of ground-breaking experiments which combine gut microbiota disorders with the course of different diseases.

The results of the studies conducted at Olimp Laboratories, as part of these advanced experiments, also allow for the ultimate improvement of the quality of the introduced product innovations.

PRODUCT CHARACTERISTICS

- A supplement whose composition supports the gain of fat-free muscle mass;
- Contains a set of advanced complex carbohydrates;
- Protein formula based on concentrate (WPC), hydrolysate (WPH) and isolate (WPI).

A professional blend that intensifies the growth of lean muscle mass. Its foundation is a complex of advanced complex carbohydrates based on long-chain maltodextrins and an excellent multi-particle wax maize starch – Waxy Maize characterized by their low glycemic indexes. The carbohydrate base has additionally been supplemented with an advanced protein formula containing a matrix of easily assimilable concentrate, isolate, and hydrolysate of whey protein combined with the slowly-digested, exclusive micellar casein.

PRODUCT CHARACTERISTICS

- The innovative energy preparation.
- Formula Liquid Technology.
- The unique composition of Extreme Speed.

All ingredients of Extreme Speed® Shot were selected to mutually supplement and intensify their effect (absolute synergy). This unique composition is supposed to intensify to the maximum the processes of production and controlled release of energy in the body at times of its deficiency.

PRODUCT CHARACTERISTICS

- A source of 6 different forms of creatine;
- Problem-free solubility and absorption;
- Carbohydrate free, does not contain sugars;
- Reduces fatigue (evidence of meta-analyses from numerous intervention studies).

Advanced composition of different absorption rates forms of creatine. Consumption of creatine increases physical performance during short-term, high intensity, repeated exercise bouts (refers to the daily intake of 3 g creatine).

PRODUCT CHARACTERISTICS

Magnesium creatine chelate is a perfect solution to the problem of the simultaneous availability of creatine and magnesium for the purposes of ATP production. Creatine increases strength and develops mass through a specific anabolic substance – adenosine triphosphate (ATP). Supplementing the diet with creatine increases the level of ATP in muscle cells.

PRODUCT CHARACTERISTICS

- 1500 mg of the highest quality taurine in one capsule;
- While that amino acid is not the structural element of body proteins, it is essential during the process of their transformation;
- Taurine inhibits the production of serotonin – a hormone that causes catabolic reactions in the muscles.

Taurine is a conditionally essential amino acid created from methionine and cysteine. It occurs in the body as a free amino acid or as a component of simple peptides – in platelets and bile, where together with the bile acid it forms taurocholic acids.

PRODUCT CHARACTERISTICS

- Multi-ingredient formula for men over 35.
- It helps in preserving natural sexual activity and energy (Maca root extract)
- It helps maintaining the right testosterone level in the blood (zinc)
- It contributes to hormonal activity regulation (vitamin B6)
- No substances considered as doping

A new composition designed by the scientists from Olimp Laboratories pharmaceutical company contains natural plant extracts (including Maca root, fenugreek seeds, saffron, Chinese magnolia-vine), which have been enriched with zinc in the form of highly absorbable Albion aminoacid chelate and with vitamin B6. What distinguishes libidobooster Olimp from other supplements of this type, is the presence of new, but gaining popularity ingredients: Shilajit, lyophilized royal jelly and the aforementioned saffron extract, which stimulate libido and support achieving and maintaining an erection!

PRODUCT CHARACTERISTICS

Helps to gain pure muscle mass;

- Decreases cortisol and stress level;
- Helps to increase testosterone level.

Composition of active ingredients containing among others zinc which helps maintain normal testosterone levels in the blood and vitamin B6 which contributes to the regulation of hormonal activity. The Rhodiola rosea extract regulates normal blood flow and helps to maintain optimal mental and cognitive activity. The KSM-66 ashwagandha extract contributes to the increase of muscle mass and adds energy.

PRODUCT CHARACTERISTICS

- Shortens the period of post-workout regeneration
- Decreases the acidity of the organism after an intense workout
- Prevents the disturbance of the acid-base balance in the organism

Provide constant parameters of intracellular environment and support mechanisms preventing pH decrease inside the body, especially during and after intense workout as well as due to improper acidic diet. The effects of appropriate proportions of bicarbonates, citrates and phosphates are supported additionally by the presence of alkali elements.

JUICY ORANGE

PRODUCT CHARACTERISTICS

- Vitamin and mineral ingredients contained in the product mutually support each other's action, among others contributing to:
- Reducing the feeling of tiredness and fatigue
- Maintaining proper psychological functions

An excellently designed powdered drink concentrate. This preparation contains branched amino acids (L-leucine, L-isoleucine, L-valine) in the 2:1:1 ratio, carnitine, hyaluronic acid. Vitamin B6 contributes to normal energy-yielding metabolism and magnesium contributes to a reduction of tiredness and fatigue
